

# AIRCRAFT ENGINE TOOLS **PROTECTING YOUR INVESTMENT**

Rhinestahl Corporation offers a full line of specialized tools for all the maintenance needs of aircraft engines. The right tools—in the hands of your specialists—will enable you to significantly reduce downtime and costs.

## **OEM QUALITY**

Rhinestahl is a leading OEM manufacturer of tools with all of the major engine manufacturers. Our tools are manufactured and inspected to the latest OEM specifications, ensuring that you get the highest level of quality at a competitive price.

Our quality system is ISO9001:2000 registered and AS9000 compliant. Routine audits and a full time quality staff ensure that you get the best tools in the industry.

## **THE RIGHT TOOLS**

We can provide the right mix of standard and specialized tools to meet your requirements:

- engine teardown tooling
- transportation dollies & stands
- module replacement tooling
- pushers & pullers
- other specialty engine tooling
- overhaul tooling
- inspection equipment
- torque wrenches
- lifting fixtures

## **YOUR SINGLE TOOL SOURCE**

Whatever your tool requirements—a single tool or complete package—count on Rhinestahl as your one-stop-source for airframe GSE and engine tooling
